

YOUR ROLE

Contrary to popular belief, gender equity programs are not just for girls: both girls and boys experience the benefits of activities, programs, and classrooms that keep gender equity in mind. Gender equity addresses different ways of learning and knowing with a goal of having every student reach their full potential.

The Girl Solution is a formula for engaging and sustaining girls' success in math and science. A critical part of that formula is **U** — the educator, the parent, the mentor. We know that girls, particularly in middle school, become less interested in science as they get older. Relationship science is a method, a way of approaching science education that can help us change the statistics and empower young women to take a major role in our future through science and technology.

Girls are particularly sensitive to the women they see around them and what they say. Knowing that media images of female scientists is rare, the lasting impressions on today's girls come from their teachers, parents and women in the field.

This toolkit provides the resources for you to begin implementing **The Girl Solution**. Equipped with everything from research to classroom evaluations, tips and techniques, we know **U** are the first line of making the formula work well for the girls around you.

Thanks for changing the world with us, one girl at a time!

—The Girls, Math & Science Partnership Team

YOU CAN HELP
GIRLS CHANGE
THE WORLD!

The Girls, Math & Science Partnership's **The Girl Solution: A Gender Equity Toolkit** is available for purchase. We recommend and provide training to groups — faculty, girl serving agencies, home school parents in using our toolkit to its maximum effect.

Interested in purchasing the kit or having us train your team? Contact us:
